

STORY 10. USERS

As a user
I want to see all registered users
so that I can update their data

WIREFRAMES

ACCEPTANCE CRITERIA

- There is a separate page (actually a separate application)
- All the registered users are shown with their first name and last name, if you click on a user, you get a form where you can edit the data of that user (first name, last name, email, GSM and password).
 - o If you change something it is immediately updated on this page.
 - o If you click the update data button it is updated on this page, in the in memory database and it is also immediately visible on the contact overview page where this person was registered as one of the contacts.
